A Word from Us to You

Dear future online Roulette dominator,

The information on our website has probably caused you to take a step back and take a whole new look at online casinos and Roulette betting. There is so much information on the internet about betting at online Roulette that it is hard to sift through and find the stuff that actually works. Many thousands of Roulette players just like you have no idea how to understand all this information and in the end only losers are created. But no longer! As soon as you read this and start using our software, you will create a gap in skill and you will be separated from the losers. Over 80% of online Roulette players are losing money and that 80% of lost cash is going straight into the pockets of the other winning 20%. After you start using our software, you will become part of that winning 20% and amazingly enough most of the 20% know and use our software.

We would like to thank you for taking the step into becoming a winning Roulette player. Read everything straight through and re-read it some more. The information displayed here can only help you in your quest for massive amounts of money. If you have questions or comments feel free to visit our website and drop us a line. We love to hear the amazing stories our users have for us. We wish you luck in your journey!

Warmest regards,

The Win-EURO Roulette Team

Chapter 1:

Win-EURO Roulette Instructions

Congratulations on your Win-EURO Purchase!

You will not be disappointed with your choice as you take some easy cash from online Roulette tables.

Before you begin, please carefully read all of the instructions and follow them exactly! **This is extremely important information that regards your use of the product. It will dictate your success.**

Practice Safe Gambling:

No matter how good a system is, you should always practise safe gambling. While Win-EURO is designed to help you beat the online Roulette tables, it is not a piece of software that can make up for stupid decisions:

- First, follow the program exactly. If you follow the program exactly, then your winnings will increase.
- Second, set a limit on your game play a day. Limits keep you from growing tired and making quick spur-of-the-moment decisions. These decisions will lower your bankroll faster than you realize.
- Third, know when to quit. Win-EURO will notify you when a Roulette table has gone sour. By this we mean, the Roulette table is sensing that software is being used, so just simply listen to the software and stop betting on

that spot. Walk away and come back another time. When Win-EURO detects a sour table, your betting chip will turn a funny light-blue colour as can be seen in Figure 1. While Win-EURO will still work, this is a warning that we recommend you follow.

(Figure 1)

- Fourth, be sure to play at only one of our recommended casinos. While Win-EURO is designed to work with all casinos, it has only been thoroughly tested at some. We know our software works at the Tested Casinos, and so once again we highly recommend you play at one of these.
- Finally, start slow and understand the theory. If you start with €1 bets, then you will need to follow the recommended table limits and per the spot limits as set out by the Options page. These are important!

There really is ZERO risk to you if you can follow these instructions!

Good luck and have fun!

Chapter 2: Important Pre-Game Instructions

1.) After installing Win-EURO Roulette v1.0, start the program to bring up the Win-EURO splash screen. From here you will have four options. Each will be discussed in greater detail further in this instructions manual. For now just know that the Instructions button brings up this page, and the Tested Casinos button is the first place you want to click.

2.) Click on the TESTED CASINOS button, and the following page will be brought up. This page contains three of our recommended casinos. Even if you already play online Roulette, we recommend you use these casinos for optimal results. To use one of our recommended casinos, simply click on the casino's banner. You will be brought to their home page where you can sign up and install their software.

Please note that for these instructions we will be using the first casino, CasinoEURO, for any further explanations.

3.) To sign up for CasinoEURO, click on the banner as shown to the right and then click on the Register and play for real money banner as shown below.

Register your account and you will be on your way!

After you register your account you will be shown two options. You can Play Casino Games for Real Money, OR you can Play Casino Games for Fun.

If you want to practice it is recommended you try playing for fun first.

4.) Once you choose either Free Play or Real Money, you will enter the casino lobby as shown in the right hand side picture.

Go under the Table Games category and search for Roulette (shown right).

Once you click on Roulette, an option will pop up that says 1-500€ 0,1–50€ be sure to choose the 1-500€ option. This will load up a table with a minimum bet of 1€ and a maximum table bet of 500€.

Now that you have an account and have found the Roulette Table, let's play!

5.) Go back to the Win-EURO Roulette software and click the Back to Main Screen button. Finally, click on the Options button.

By clicking on the Options button, the following screen (BELOW) will be brought up. Here you may do a variety of things, which include:

- Change the currency from EUROS, to British Pounds, or US. Dollars!
- Switch between Game Modes.
- Change your Time per a Session.
- Change your Amount to Bet.
- And an "Always on Top" option. (Recommended.)

Be sure to move your mouse over each item to get a full description!

When you are done making your changes, (at first it is recommended that you don't change anything,) click on the Begin! button to set the values and bring up the main piece of software.

6.) Once the main Win-EURO Roulette software board loads, go back to the CasinoEURO.com Roulette table and position the Win-EURO program to the right of the Roulette table as is shown (PAGE 8).

Click on Start on the Win-EURO Roulette

Win EURO-Roulette v1.0

Software and then click Spin on the casino's Roulette table.

7.) Once the ball lands on a number, click on that number on the Win-EURO Roulette software. Once you have chosen the number, click the Submit button to enter it into the software.

8.) When Win-EURO Roulette determines a good place for you to bet, red betting chips will appear on the Win-EURO screen in the locations you should place your bets. The amount on the chip will be determined by what you set up under Options.

The default value is €1.

And that is all!

When you win a bet, Win-EURO Roulette will go back to a regular screen and your casino account will be credited the money. Remember to have some fun while using the amazing power of this software!

Remember – programs can't guess 100% correctly all the time and you have to be realistic and expect some losing sessions from time to time. The goal is to win good profit in the long run!

Chapter 3:

Tips and Tricks from People Like You

1.) Deposit the maximum cash in order to get the maximum bonus!

That's right! When you start out, deposit the maximum cash to take advantage of the Casino bonus. Play the rounds necessary to be entitled to withdraw your profits. Withdraw your capital + eventually the price for our software. From then on you will just gamble with house money.

2.) Prepare to lose!

You will lose. But don't let this scare you away, the software works! The videos you have watched on the site are 100% real! Those are the days when the Win-EURO software and Lady Luck work together in perfect harmony. Those days will happen to you just as much! Our customers before you have won so much using our software. Remember that monthly profits are the key. Always keep the big picture in mind and you will always walk away a winner!

3.) Keep a tight money management system!

Never ever go crazy and don't panic. EVER! When you start losing QUIT it. When the software tells you to Switch tables or stop, QUIT. Call it a day and take a run, or spend sometime with friends, and then come back later. The mind is so very powerful and important here. Your mind can make you start taking risks so you must make sure NOT to let this happen. Also, never bet all your money. We recommend playing with only 5% of your bankroll on every bet. This rule is very hard to follow and a few had to learn the hard way. Make sure you learn now and not when your bankroll hits 0. Keep a cool mind and follow the system and you will never go wrong!

4.) Don't spend what you can't afford to lose!

Be cautious when playing the fun game of Roulette or any gambling game in general. Make sure you are looking after yourself and your family first before you gamble your money. Even if the software is great and will make you money, it is still gambling and must be treated as such. If you feel you have a gambling problem please contact the people who can help you. Don't let it get out of hand.

5.) Have fun!

This is the most important advice you can follow. Enjoy gambling! If you start to get anxious and angry while playing these fun games, quit for a day or two. Getting angry because you have hit a dry run can only work against you. Don't let this happen. Get mad and lose your cash... Have fun and win hundreds!

Chapter 4:

Important Advice

- 1.) You should use Win-EURO Roulette on a demo account first (Play For Fun). Once you have gotten use to our amazing software and gained a little experience, then go and play for real money. Practice, Practice, Practice!
- 2.) Try and not play with large sums of money! Only up the amount you play with when you have enough money to do so. It is better to make a small stable income everyday than risk losing everything!
- 3.) Win-EURO Roulette works perfect in casinos with honest MD5 systems. That is why we suggest you use our software in the casinos we have tested it at. The suggested casinos have been 100% tested with our product and when used right, will always win!
- 4.) If you lost a bet, stay calm and listen to the software. It will constantly keep you up to date on what you need to do. The worst thing you can do is NOT LISTEN to Win-EURO Roulette!
- 5.) Remember “Money Management”. Do not make bets larger than 5-15% of your balance! It is just too risky with anything more.
- 6.) When you do win a lot of cash, quit for the day. It is best NOT to make the casinos suspicious of your account!
- 7.) Win-EURO Roulette is a great helper and when used right WILL win. Just make sure to always think for yourself first before making any real bets! Only you can be responsible for any losses and most importantly all the wins. Remember – Playing any type of casino game is risky business and does have the potential for HUGE WINS but also substantial losses. Do not invest any more than what you cannot afford to lose.

Last but not least, enjoy the game and the thrill of winning!
